

# Curriculum Vitae

*Peter Olsson*

**Nationality:** Swedish

**Residence:** Stockholm

**Born:** 20<sup>th</sup> of September 1973

## *Background*

Born in Gothenburg, grown up in the countryside, on and in the sea near the small coastal town of Marstrand. Second child, first son in a family of four children and with the families of two uncles within a hundred meters gave a strong sense of family and always working together. My father and two uncles were all working in different technical professions and one day one of my uncles brought a computer home from work. I was about ten years old and I was quickly seduced by its possibilities. Later on I got the chance to visit my uncles job and see how they were working with 3D programming tools for industrial robots at Volvo. Since then I have been working with 3D software in one-way or another. The fascination of computers and my love for drawing and creating has always set the tone for my career choices in life. Beside my affection for technology I love to play hockey (played since I was six and still do). I also try to expand my mental borders and try new things as much as I can.

## *Career History*

**January 2012: CEO and founder of cadpillar AB**

ArchiCAD consultant with 3D-measuring & modeling

**January 2008 – January 2012: Graphisoft Sverige, Sales/Education/Consultant**

ArchiCAD and ArchiCAD Add-ons, Stockholm, Sweden

Selling CAD solutions to architects and contractors, meeting users, decision makers and economy departments.
